

18:820:526: Assessment and Data-Based Decision Making (GSAPP; 3 Credits).

The purpose of this course is to build knowledge and skills required to engage in forms of assessment used in MTSS, and to use data collected from assessments to guide decision making at the individual and systems levels. This course will help students learn basics of psychometrics, assessment (focused primarily on curriculum-based measurement), and will familiarize students with current best-practices in data-based decision making. It is expected that students completing this course will be able to translate findings from research into data practices that guide and improve support for all learners.
