

Graduate School of Applied and Professional Psychology (GSAPP)
Rutgers University
New Brunswick, New Jersey
Fall 2021

Introduction to Analysis and Single-Case Design
18:820:512
Credits: 3
Level: Graduate
Tuesdays 6:15 pm to 8:45 pm at SMH-200

Instructor: Daniel R. Mitteer, Ph.D., BCBA-D

Office: CSH-RUCARES, 888 Easton Ave, Somerset, NJ 08873

Phone: 848-800-8506

E-mail: Daniel.Mitteer@rutgers.edu

Office Hours: The instructor will make every reasonable effort to meet with students whenever necessary. Due to COVID restrictions, meetings are not available at my work office and will be done via videoconference. Please email me to schedule.

Rutgers University Mission

As the premier comprehensive public research university in the state's system of higher education, Rutgers, The State University of New Jersey, has the threefold mission of

- providing for the instructional needs of New Jersey's citizens through its undergraduate, graduate, and continuing education programs,
- conducting the cutting-edge research that contributes to the medical, environmental, social, and cultural well-being of the state, as well as aiding the economy and the state's businesses and industries, and
- performing public service in support of the needs of the citizens of the state and its local, county, and state governments.

Each component of the university's mission reinforces and supports the other two.

As the University of New Jersey®, Rutgers is dedicated to teaching that meets the highest standards of excellence, to conducting research that breaks new ground, and to provide services, solutions, and clinical care that help individuals and the local, national, and global communities where they live.

GSAPP Mission

The mission of GSAPP is threefold: education, research/scholarship, and public service. Its goal is to prepare well-educated, qualified, and competent direct-service psychologists who have a special commitment to direct community involvement and to underserved populations--professionals who can integrate scientific knowledge with innovation in the delivery of psychological services to individuals, families, groups, and organizations. Professionals receiving a doctoral degree in psychology should be capable of extending psychological knowledge and exhibiting the high level of analytic skills and theoretical understanding needed to use existing and emerging psychological knowledge.

Core Values. We are guided by four core values that are apparent in our learning environment, centers, and clinics:

1. **Academic excellence** in preparing students for careers in clinical and school psychology.
2. Commitment to **social justice** and helping **underserved populations**.
3. **Diversity** of students trained, approaches used, theoretical orientations followed, and populations served.
4. **Knowledge generation and dissemination** using contemporary research approaches.

MAP Statement

The program embraces the mission of the school by offering instruction that has an emphasis on civic and global citizenship, social justice, and cultural diversity. This course of study provides students with the knowledge needed to understand individual and collective behaviors; develop quantitative and qualitative statistical analysis and research design needed to analyze the corresponding physical and environmental contributors to human behavior; and a beginning understanding of the analysis and treatment of behavior problems and disorders.

The MAP degree will prepare students with the requisite theoretical knowledge; critical thinking and problem-solving skills needed to successfully participate in employment or scholastic activities. Students will have opportunities to pursue scholarly activities that prepare them to successfully compete for admissions into doctoral-level psychology and related academic programs and pursue master's level career pathways through available concentration and certificate programs (see examples of concentration areas listed below). In addition to completing the required coursework (36 credits), completion of the MAP degree will be marked by a culminating academic experience—Capstone project (either a research project/presentation (3 credits) and experiential learning activity (6-credit practicum training). In general, students will acquire a knowledge base grounded in psychological theory and experiential learning (research or practicum) designed to further advance their personal and professional career development.

Course Description/Overview

This course will introduce the student to the process of analysis using baseline logic and how it applies to a single-case methodology. The course will provide an overview of behavior measurement and recording, and visual analysis and graphing. Basic single-case research designs will be discussed, including general characteristics, strengths, and considerations. General issues regarding internal and external validity will be discussed, as well as ethical considerations in research design and implementation. Students will practice applying the principles for research design and ethics to the interpretation of research literature.

Objectives for the Course

The student will be able to:

1. State the principles of baseline logic.
2. Describe the process of planning and directing behavior recording procedures.
3. Identify key features or visual data display and analysis.
4. Identify and describe the advantages and disadvantages of basic single-case designs.
5. Discuss issues in planning, replicating, evaluating and disseminating ABA research.
6. Describe ethical principles as they related to ABA research.
7. Interpret research articles from the behavior analytic literature.

Assignments

Pre-Class Assignments (PCAs)

Prior to most Tuesdays, there will be a PCA due on Mondays by 11:59 pm. PCAs will include (a) answering guided-reading questions, (b) generating discussion questions, and (c) reflecting on conceptual or ethical phenomena. Each activity will be worth 10 points, with 8 points assigned to content and 2 points for writing style and grammar (according to APA guidelines). These should be completed in a Microsoft Word document and uploaded to the respective Canvas assignment (e.g., Week 2 PCA). I am unable to open Mac documents, so please avoid uploading .Pages documents.

In-Class Assignments (ICAs)

Approximately every class will involve some form of ICA, including (a) experimental-design exercises, (b) small-group or large-group discussion, and (c) practice of behavior-analytic skills [e.g., data collection, graphing]. Each activity will be worth 10 points, though I may deduct or assign bonus points if I notice less-involved participation or exemplary group leadership, respectively. These will be due either at the end of class for physical materials or by 11:59 pm for Canvas submissions.

Exams

There will be two exams throughout the semester, each with a time limit of 2 hr. The first exam will take place in the middle of the course and cover topics from Weeks 2 through 6. The second exam will take place at the end of the course and cover topics from Weeks 6 through 12. To maximize the number of topics we cover during the semester, these exams will take place on Canvas and will be completed outside of class time. These are open-note exams. However, most questions will involve critical thinking and application of concepts that may not be evident from simply reviewing the reading material or your notes. Questions will be a combination of multiple choice (simulating the BCBA exam), short answer, and essay. Keep in mind that Canvas provides me a record of computer activity during assignments.

Research Proposal

Each student will be required to complete a 4- to 6-page paper (not including references or figures) outlining a hypothetical study. Because this is a proposal, you will use the future tense in your writing. These need to be uploaded to Canvas by Friday 11/26/2021 at 11:59 pm. There will be three opportunities to receive feedback on your proposal throughout the semester. Proposal ideas will be due on Week 4, and I will provide feedback on the ideas. The initial draft of the method and results will be due on Week 8 for peer review and the initial draft of the introduction (often completed after nailing down an experimental design and results) will be due for peer review on Week 11. This pacing and feedback should ensure a high-quality submission by the proposal deadline.

1. Introduction

- Purpose/Background: Brief description of the purpose of the proposal.
- State your research question.

2. Method

- Participants/Setting: Where you will run the study and with whom?
- Measurement: What are you going to measure? How?
- Research Design: Which design (e.g., multiple baseline, reversal) and why (be sure to discuss baseline logic)?
- Procedure: How will you conduct sessions?

3. Hypothetical Results

- Create mock data. These graphs should match the desirable qualities discussed in class.
- What you think the data might look like?
Why would you expect to see that?

Important Note: Plagiarism essentially means that you cannot use the words and ideas of another person without giving them credit. Therefore, “quotation marks” should be used to indicate the exact words of another. Each time you paraphrase another author you will need to credit the source in the text. If you have any questions about what constitutes cheating or plagiarism, please see me. Students who plagiarize any material will earn a grade of F for the course.

Presentation

Each student will conduct a 10- to 15-min presentation summarizing their proposal for the class. Students should use PowerPoint slides for the presentation and be prepared to discuss them and respond to questions.

Bonus Assignments

Throughout the semester, there may be new articles or compelling topics that come to light that allow students to apply concepts or skills from class within the scope of bonus assignments. I will keep you posted as new opportunities arise.

Policy on Late Assignments

I take the timely completion of the course requirements to be a matter of your priorities, both academic and personal. Work should not be late due to poor planning, competing requirements, or other interests. If you foresee having difficulties, we should discuss this beforehand so we can navigate these challenges together. I highly encourage you to submit your assignments well in advance of 11:59 pm to troubleshoot technical issues. In most cases, any submission attempt after the due date will be given a 0.

Assignments and Evaluation Method

Pre-class assignments	110 points
In-class assignments	120 points
Exam 1 (Weeks 2-6)	100 points
Exam 2 (Weeks 7-12)	100 points
Research proposal	50 points
Presentation	20 points

Total **500 points**

Grades and Grading Policy

Grade Description	Numerical Equivalent
A Outstanding	90-100 (4.0)
B+ Intermediate Grade	87-89 (3.5)
B Good	80-86 (3.0)
C Average	70-79 (2.0) Grades of C do not count toward graduation
F Failure	69 or below (0.0)
INC Incomplete	
S Satisfactory	
U Unsatisfactory	
PA Pass	
NC No credit given	

Program Requirement

All MAP and Graduate Certificate in ABA students must achieve a grade of B or better and maintain a GPA of 3.0, or academic remediation will be enforced.

Required Text

Kazdin, A. E. (2021). *Single-case research designs: Methods for clinical and applied settings (3rd edition)*. Oxford University Press.

I will post all other required readings on Canvas.

Course Outline

Each week will contain 3-4 assigned readings. I will likely make changes throughout the semester as I find more recent or relevant readings. You will always be notified with at least one week prior to class. Each Canvas module will have the most up-to-date readings and assignments for that week.

Week 1 (9/7): Course Overview

- Baer et al. (1968)

Week 2 (9/14): Introduction to Single Subject Design and Analysis

- Blampied Ch 8
- Kazdin Chapter 1: Introduction and Historical Perspective
- Kazdin Chapter 2: Underpinnings of Scientific Research

Week 3 (9/21): Data-Collection Basics

- Kazdin Chapter 3: Background and Key Measurement Considerations
 - Kazdin Chapter 4: Methods of Assessment
 - Meany-Daboul et al. (2007)
 - LeBlanc et al. (2016)
- Week 4 (9/28): Integrity of Independent and Dependent Variables**
- Kazdin Chapter 5: Ensuring the Quality of Measurement
 - Vollmer et al. (2008)
 - Cook et al. (2015)
 - Proposal idea due for instructor review.
- Week 5 (10/05): Experimental Design Basics – Internal Validity and ABAB Designs**
- Kazdin Chapter 6: Introduction to Single Case Research and ABAB Designs
 - Campbell & Stanley (pp. 1-24)
 - Petursdottir & Carr (2018)
- Week 6 (10/12): Multiple-Baseline and Multiple-Probe Designs**
- Kazdin Chapter 7: Multiple Baseline Designs
 - Carr (2005)
 - Christ (2007)
 - Gast et al. (2014)
 - Exam 1 due by 11:59 pm on 10/15
- Week 7 (10/19): Changing-Criterion and Multielement/Alternating-Treatment Designs**
- Kazdin Chapter 8: Changing-Criterion Designs
 - Kazdin Chapter 9: Multiple Treatment Designs
 - Hartmann & Hall (1976)
 - Higgins Hains & Baer (1989)
- Week 8 (10/26): Additional Designs (Repeated Acquisition, Combinations)**
- Kazdin Chapter 10: Additional Design Options
 - Ledford & Gast (2014). *Start at “Simultaneous Treatments” (pp. 352-373).*
 - Kirby et al. (2021)
 - Proposal method and results due for peer review.
- Week 9 (11/2): Graphical Displays of Single-Case Design Data**
- Kazdin Chapter 13: Graphic Display of Data for Visual Inspection (pp. 340–352)
 - Mitteer et al. (2018)
 - Mitteer & Greer (in press)
- Week 10 (11/9): Visual Inspection**
- Kazdin Chapter 13: Graphic Display of Data for Visual Inspection (pp. 353–387)
 - Bourret & Pietras (2012)
 - Roane et al. (2013)
- Week 11 (11/16): Generality of Single-Case Designs**
- Hoagwood et al. (1995)
 - APA task force (2006)
 - Smith et al. (2007)
 - Hagopian et al. (2020)
 - Proposal introduction due for peer review.
- Week 12 (11/23): Social Validity (No Class – Independent Activities Due by 11:59 pm on 11/23)**

- Fawcett (1991)
- Wolf (1978)
- Hanley et al. (1999)
- Research Proposal Due by 11:59 pm on 11/26

Week 13 (11/30): Proposal Presentations

Week 14 (12/7): Proposal Presentations

Week 15 (12/21): No Class – Exam 2 Due by 11:59 pm

Academic Integrity

All Rutgers students should review and adhere to the University principles of academic integrity, available at <http://academicintegrity.rutgers.edu/academic-integrity-at-rutgers/>

APA Citation Style

All papers **MUST** be written using the APA style (7 ed.).

Student Resources

For more information visit <https://gsapp.rutgers.edu/current-students/important-links>.

Accommodations Due to Disability

Rutgers University welcomes students with disabilities into all of the University's educational programs. In order to receive consideration for reasonable accommodations, a student with a disability must contact the appropriate disability services office at the campus where you are officially enrolled, participate in an intake interview, and provide documentation:

<https://ods.rutgers.edu/students/documentation-guidelines>. If the documentation supports your request for reasonable accommodations, your campus's disability services office will provide you with a Letter of Accommodations. Please share this letter with your instructors and discuss the accommodations with them as early in your courses as possible. To begin this process, please complete the Registration form (<https://webapps.rutgers.edu/student-ods/forms/registration>).

Title IX

<http://compliance.rutgers.edu/resources/resources-for-facultystaff/>

Counseling services

Students often experience personal problems or difficulties during the term that may interfere with learning and their daily activities. If you or someone you know needs to talk to someone regarding such personal issues, the University provides free counseling services through the Counseling and Psychological Services (CAPS) and their information can be found at

<http://psychologicalservices.rutgers.edu>. They also offer several useful workshops for general stress management and techniques for promoting mental health. If you have any questions about CAPS or other services, I am happy to speak with you privately.
