

18:820:528: Data-based Decision Making for Intervention in Elementary Literacy (GSAPP; 3 Credits).

Students who take this course will build upon their knowledge of data-driven decision making in the area of early reading. Lessons will cover how to select and use reliable and valid universal screening measures, how to use data to group students for intervention, and how to effectively select and apply procedures found to be reliable and valid for determining students' response to reading intervention.
